

Détail de l'offre : Project Manager (DACH region and all over Europe) H/F

Recruteur	
Référence	23D1699953818
Titre de l'offre	Project Manager (DACH region and all over Europe) H/F
Description de la mission	As part of the Operations department, you will work jointly on various projects from the pre-sales phase through to plant commissioning and bringing our robots alive in our clients' environments!

Throughout the lifespan of your projects, you will be responsible for the following activities:

Supporting the technical and economic feasibility study, in close collaboration with Business Development.

Application of the Balyo internal project management procedure to set up your projects for success

Working together with our clients to get their processes automation ready and defining the specification

Supervision of internal design, production and validation activities

Organization and management of installing our robots within our customer's environments

Setting up and monitoring schedules and budgets

Supervision of customer, in-house teams and potential partners.

Managing a team of several installation engineers

Use your learnings to improve the way how we install our cutting edge technology in real world applications

The position will involve occasional travel to our customers' sites in the DACH region and all over Europe.

The position can be based at our headquarters in Arcueil or in Germany.

Type de contrat	CDI
Télétravail	Non spécifié
Client	BALYO
Localisation	Paris
Pays	France
Description du profil	Engineer, with 3 to 6 years' experience in managing complex mechatronics projects (automation, automotive, aeronautics).

You have skills in mechanics, electronics and embedded software development and know how to apply and improve processes.

Ability to manage several projects at the same time.

Fluency in English and German is essential. Applications not meeting this criterion will not be considered.
